If you choose to recertify or reinstate by CERPs you are required to use the Personalized Professional Development Plan determined by the CE Self-Assessment to guide your CERPs hours. If a course or program covers more than one category/required area, you may allocate the CERPs across the categories where they are needed. For example, Breastfeeding Basics provides 11.25 L-CERPs. One could assign 4 L-CERPs under Pathology, 4 L-CERPs under Techniques, and 3.25 L-CERPs under Clinical Skills.

The determination for the total amount of CERPs available was provided by IBLCE after they reviewed the course content. The determination for the category designation was made by the trainer after reviewing the course content and [IBLCE Detailed Content Outline for IBCLC CERPs](#).
